RIMBUNAN PELANGI ADOPT A CHILD

Ain Society launched the "Rimbunan Pelangi Adopt a Child" initiative on March 26, 2024, which was officiated by our patron, Mdm Halimah Yacob.

Adopting a Child with Cancer and Their Family: For a pledge of \$400 per month for a year, donor can extend emotional, social, and consumable support to a child with cancer and their entire family. This support extends beyond medical treatments, offering crucial emotional aid through counseling and therapy. It ensures these children can maintain a sense of normalcy by participating in activities and events. Donors' contributions can make a significant difference in their lives, providing more than just medical care and offering a vital lifeline of support for these brave children and their families.

Donors may choose to either :

- Interact with the child and their family members at our center at every 3 months.
- Donors may also choose to celebrate the children's birthday at the center.

Special Educare Fund: With a commitment of \$1000 per child per year, donor can contribute to this initiative and adopt a child with special needs resulting from their cancer treatment. Whether they are attending a special school or a mainstream one, these children, despite their health challenges, are determined to continue their education. By opting to adopt them through this scheme, donor can ease their path, aiding them in pursuing their educational dreams amidst their health struggles.

Children and youth who are continuing their education often face unique hurdles. They may need costly assistive devices for mobility, regular repairs, and assistance with transportation due to their condition. Vision-impaired children, often a consequence of brain tumours, require assistive technological devices.

By participating in this initiative, you can make a significant difference in these children's lives, helping them overcome their challenges and continue their education journey. Your support can provide them with the tools they need to thrive despite their circumstances. Thank you for considering this opportunity to make a meaningful impact.

Similarly, donors may choose to either :

- Interact with the child and their family members at our center at every 3 months.
- Donors may also choose to celebrate the children's birthday at the center.
